## Product Data

- Ready to use combination seals, no timeconsuming and “tricky” assembly
- Available as closed top screw seals or with centre hole in white 24 - 400 caps
- Broad variety of different septa materials for almost all applications
- Also UltraBond Seals ND24 are offered, i.e. that the cap and the Silicone/PTFE liner of these seals form an inseparable unit avoiding the problem of liners falling out of the cap. This 100 % firm fit of the liner is achieved by a patented process that requires no adhesives, but instead changes the molecular structure of both components to achieve the fixation
