Product Data

Low TOC Alpha® Polyester Knit TX714K Large Cleaning Validation Cleanroom Swab, Non-Sterile

Texwipe's **cleaning validation cleanroom swabs** are used to determine the **effectiveness of cleaning protocols** as specified by the **US FDA. HPLC/ UV-Vis Total Organic Carbon (TOC) analysis** are different methods used to validate these cleaning processes.

- **Alpha®Polyester Knit Series** - suitable for use in **TOC analysis**

NSF Certified to be acceptable for use as a **Cleaning Swab (P1)** in and around **food processing areas**. The product must only be used in such a manner as to ensure it will not have direct contact with food or potable water. Use must also be consistent with the manufacturer's directions.

Benefits

- All Cleaning Validation swabs are precision-manufactured and constructed to exacting and consistent tolerances **without the use of adhesives** for superior performance
- **Notched**, rigid 100% polypropylene, **break-away handle** allows the head to be placed into the vial with **minimal handling and contamination** and provides excellent chemical resistance
- **Lot coded** for traceability and quality control
- **Certified Low TOC level (<50 g/L, <50 ppb) ensures consistency in swab background contribution**
- **Double layered, double knit polyester head** entraps contaminants in the knit structure during sampling, allowing **maximum contaminant collection** and release into the diluent to provide for excellent recovery rates
