Product Data

Small culture flask, welded onto a 26 x 76 mm microscope slide. Two types of culture support: Nunclon culture-treated plastic slide (this support enables cell binding but excludes the use of organic solvents) and the glass slide. After culturing the flask is easily removed from the slide onto which the cells may be attached and dyed. A 18 x 50 mm glass coverslip may be used. For fluorescent microscopy of endothelial cells in the diagnosis of mycoplasmosis, Caryotypes on amniotic liquids, autoradiography of cells treated with tritiated thymidine during intracellular DNA synthesis.

- Sterilised by gamma irradiation

Slide Flask (shown with black cap in photo):

- Employs tissue culture-treated polystyrene slide attached to 18 x 50 mm flask structure via ultrasonic weld, allowing for long-term, leak-free incubation
- Upper flask structure snaps away easily after culture, freeing slide for microscopic examination
- Thermo Scientific™ Nunclon™ Delta certified
- Available coverglass (7.1718.62)

Flaskette (shown with white cap):

- Glass slide with a silicone gasket and a 20 x 50 mm upper flask structure
- Can be sealed to exclude air—useful when embedding cells in resin for electron microscopy
- CE marked

Item No.	description	area	packaging	Price
7.1709.20	Slide Flask with plastic slide	9 cm ²	10 packs x 5 pieces	CHF 873.80
7.1718.62	Glass slide 18 x 50 mm	---	10 packs x 100 pieces	CHF 1'044.22
7.1774.53	Flaskette with glass slides	10 cm ²	6 packs x 16 pieces	CHF 2'141.70

* The prices are non-binding and are to be understood as selling prices in Swiss francs without value added tax (VAT), as well as all other fees, charges and taxes. The prices displayed in the eShop may differ from the PDF file due to regular updates.

** Please note that when ordering chemicals and detergents, transport and packaging costs for hazardous goods as well as legally prescribed fees are charged. These will be shown in detail on the order confirmation, which you will receive in addition to the confirmation of receipt.
